# Euro Twin Wall Spot

Cat. No. ETWS Cat. No. ETWS/R

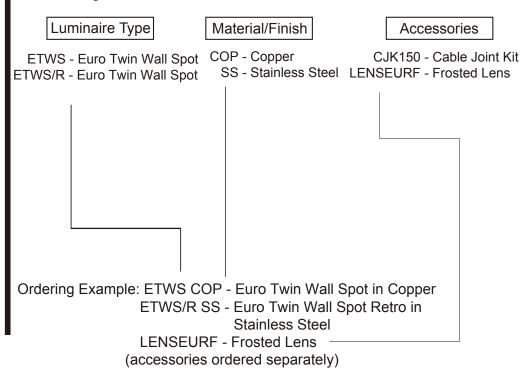

The Euro Twin Wall Spot has been designed for situations where the luminaire needs to be discreet. The smaller sized MR11 lamp is utilised to achieve this. Each spotlight can be aimed in any direction and have a built in glare guard to reduce glare. This luminaire has fully adjustable arms, allowing 360 degree rotation and 0-90 degree elevation. The Euro Twin Wall Spot has been designed to be mounted on walls and provide directional light for pathways and structural elements of a building.

The Retro version is a 110/240-12 volt AC mains option, suited to an installation where mounting a transformer is a problem. For example, a brick wall where there is only the cable protruding out of the wall and there is no option to recess the transformer. The base increases in size to accommodate the encapsulated IP66 dimmable transformer.
